

MyJobMatch

is building connections between job seekers and employers for a future that welcomes, values, and respects everyone.

MyJobMatch is a new technology-enabled employment services program that combines three job placement tools to provide employers with access to candidates with disabilities:

-  **A collaborative network of employment support agencies** working together to provide services to more job-seekers and employers
-  **Skilled Employment Support Professionals** who support job seekers with disabilities, and employers through the recruitment, hiring and retention process
-  **Powerful software** that effectively matches job seekers to jobs based on several criteria (skills, interests and location)

What makes MyJobMatch unique?

-  **MyJobMatch** is a **collaboration of multiple employment support agencies** working together to match the right job seekers with the right jobs for long-term success – you are no longer working with just one agency at a time.
