MyJobMatch

**Building Connections
for an Inclusive Future**

MyJobMatch

is a new supported employment process with a complementary online tool.

What makes MyJobMatch unique?

MyJobMatch uses a collaborative, community approach that allows multiple disability organizations to work together to achieve more employment opportunities for job seekers with a disability.

The *MyJobMatch* program and web application is specifically designed to help your organizations employment support professionals do their work faster, more efficiently, and more effectively.

Using the web application, organizations can access a shared database of employers and job seekers to see if there are potential matches based on keywords, interests, skills, and locations. It can track current employment for individuals, helping build, and manage an individual's schedule.

In addition, *MyJobMatch* has a public job network that allows supported employment providers across agencies to share job opportunities, removing the pre-existing boundaries that once limited the opportunities available to people with disabilities. Our goal is to create a system that will enhance and compliment a future process that is more collaborative and impactful.

> The MyJobMatch program provides collaborating agencies with:

A **web application** that makes matching job seekers with jobs and tracking key indicators, more effective and efficient

Training for staff to use the web application to increase program reach and productivity

Implementation tools including an assessment of your current program, a detailed implementation pathway, outreach strategies, and promotional materials

Continuous program monitoring and improvement system to help you use data to make program improvements, manage resources, and stay on track to meet funding targets

With *MyJobMatch* we are breaking down barriers and changing employment of persons with a disability in Ontario.
